This section could be quite lengthy depending on the depth of the children's thinking. Discussing and reporting back orally will often be the best form of getting back their responses. These discussions can get quite deep (which is the whole point of it), so it is important to make sure that enough time is given for each child to give their viewpoint (as it's all about making the right decision and considering all the consequences of their actions). There are no correct answers.

You get to school and have a word with your principal. You tell them that your teacher is just stressing you out with all the work. You tell the principal it's either the teacher or you as you are just stressed out and you need a break from them. The principal agrees and you both decide to send your teacher to an old folks home for the week. The costs are normally \$56.00 per day, but it is an extra \$10.50 each day if they are a teacher. It will also cost \$12.50 in total to transport your teacher. You tell your teacher they are being shouted to lunch (after which they will send them to the old folks home), and that will cost an extra \$11.00 (one off cost). How much will it cost for the whole five days?
