How Many?

*These numbers are just here for reference.*

- 0 1 2 3 4 5 6 7 8 9 10
- 11 12 13 14 15 16 17 18 19
- 20 21 22 23 24 25 26 27 28 29
- 30 31 32 33 34 35 36 37 38 39
- 40 41 42 43 44 45 46 47 48 49 50

**copy over the number words**

One one

Two two

**Picture 1 of a different 'A' word**

Child to draw another 'A' picture that is different from those 'A' words given on this sheet.

**Picture 2 of a different 'A' word**

Child to draw a second 'A' picture that is different from those 'A' words given on this sheet.

Some extra notes on these sheets, although please use these in anyway that best suits you and your children

- There are two sheets for each letter. Both sheets could be photocopied onto an A3 sheet for the child to do.
- I have intentionally used different images and words from those on standardised letter cards to give the children something different from the normal cards and vocabulary. This is also done so the easier words are left for the children when they are asked to find/draw other things to do with each letter.
- The sheets have been designed to try and make them as independent as possible for the child. All the sheets follow the same consistency, so as more are used, hopefully less input will be needed from the teacher, keeping in mind that these sheets are more so 'work sheets' to allow the teacher time with other children, although they can also be used as individual/group/class lessons.
- Depending on the age and ability of the child, as the numerals increase, some may find the writing/recognition of the actual numbers difficult. E.g, a 7 year old may be able to recognise 29, but a 5 year old may not. Please keep this in mind.
