

Literacy Contract Exercise

GUIDE SHEET

© C. Stevenson / Kiwi Resources
kiwiresources@vodafone.net.nz

These 20 sheets have been largely written for the lower end of the school (as the contract homework sheets have been written mainly for the middle/upper levels). **Green** for main level focus, **Orange** for secondary level focus, **Red** can be used at the level if required. However, these levels are not absolute and can be used for both fast finishers as well as higher children with a lower ability level. Use them with any child based on your professional judgment. I have attempted to make them so they are both visually stimulating to the child, as well as attempting to make them as much as possible for the child to do in an independent state. Of course this is dependant on the child's level of independence/ability. Colours have been used, so children don't feel embarrassed if they are an older child working at a lower level (only the teacher will know the true relevance of the colours). There are no set rules for these sheets. The work can be done either on part of the sheet and part on paper/in their books, or the child can cut out the pictures/sections and paste them in a book, with their work written under them. Again, there are no set rules, just whatever works for the teacher and child. Marking can be done either in a 1:1, group or class situation.

Curriculum Areas: Major Focus: English

This can be used either as a tick box when completed, or the teacher can write in how many things/sentences they want the child to write in relation to the cues.

Means the child or teacher chooses an activity for the child to do on their own. This could include construction, colouring, board games, playdoh, sandpit, string etc.

As per  but with a partner.

Picture

Children write either words/sentences based on the picture cue. The teacher can write how many sentences they want the child to write in the sun symbol. The child could also do their own illustration based on the picture shown.

Picture/Symbol

Children write either words/sentences based on the picture/symbol cue. **The main point here is for the child to recognise what it is/what it is used for.** The teacher can write how many words/sentences they want the child to write in the sun symbol. The child could also do their own illustration based on the symbol/picture.

Safety

Children write either words/sentences based on the symbol/picture cue. **The main point here is for the child to recognise what is wrong with the image/ what it's used for/ what it means/ how this could be prevented.** The teacher can write how many words/sentences they want the child to write in the sun symbol. The child could also do their own illustration based on the picture/symbol.

Letter/Blend/Sound

Children write either words or draw illustrations based on the letter/blend cue. The teacher can write how many they want the child to write in the sun symbol. Some children will only be able to do the letter, while some will be able to do the blend as well.

Numbers/Numerals

Colours

The intention of these two sections are for them to be combined. That is that the child incorporates the number/numeral (1-12) and colour together using the picture. E.g, the ones listed on worksheet 1, means that the child writes  Five,  Five,  Five,  Five,  Five. The child may also want to colour in the picture and colour word shape on the sheet.

Activity

Self explanatory. This may be done on their own or with another person (peer activity etc).

Cartoon/Sketch

This is where the child makes a sketch/cartoon based on the picture given. It can be copied and/or they could do their own as a sequence. As an extra, children could also write in captions. Some worksheets will have half the picture covered. Children draw the other half of the picture.

Various

These will be varied and most will have instructions as to what to do.

Reference

These have just been put in for the child to use before coming to the teacher/attempting to get the child to show a higher level of independence before seeking assistance.
