A Few Notes...

- There are 10 contracts in this set and they are available as either a PDF set (print) or as a MS Word version (allows contracts to be done on computer using MS WORD).
- This is the New Zealand version.
- Please note that although I take credit for the format and content of this resource, I do not take credit for the images used.
- If these are being used as a class/group exercise, they could be enlarged to an A3 size to make them easier for a group to do.
- Included in this Answer Sheet is also a cover page which can be used to assess/checklist each contract as they are completed.
- I have also included below an image of each New Zealand denomination (could be used to scan/enlarge/cut out etc).
- I have attempted to make each contract include both an easy set of tasks, as well as a harder set of tasks, to try and cover enough for both children who have difficulty as well as for those children who are more able in this area.
- Some images only show half/part of a denomination. This does not mean it is half of its value. It is simply as I was running out of room and didn't want to make the images too small.
- Answers are included below for all 10 contracts.
- Not all questions/tasks have answers. This is simply as some answers will depend on the denominations used by the children. These questions are stated on the answer sheet.
- This resource was completed in August 2010.

As with any of my resources, there are no rules except for your own. Use them in any way which best suits you and your class/students. I hope the resource is of use and the children enjoying doing the contracts.
